### **DETAILED ACTION**

## Acknowledgment

1. The amendment filed on 9/23/2005 has been entered.

# Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1-8, 11-14 and 17-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Heyden et al. (6,388,348).

Heyden et al. in figures 1 and 3, disclose a drive system (10) for a motor vehicle. The drive system comprises a drive shaft (12), a centrifugal mass (24) mounted on the drive shaft for rotation about an axis and being profiled with an axial receiving space. Heyden also discloses an electrical machine (48) comprising a rotor (54) mounted on the centrifugal mass and a stator (46) arranged radially with respect to the rotor. Heyden also discloses a clutch (26) having at least one component spaced radially inward from the electric machine in the receiving space (Notice the electric machine located in front of the clutch in a housing (74). Therefore, the clutch can be considered inward from the electric machine).

Application/Control Number: 10/678,334

Art Unit: 3618

Regarding claim 2, Heyden et al. discloses the electrical machine, which is mounted on a side of the centrifugal mass, which is mounted to the drive shaft.

Regarding claim 3; Heyden et al. discloses a housing (74) having at least one part. The centrifugal mass and the electrical machine being arranged in the housing.

Regarding claim 4, Heyden et al. discloses a stator bracket (not number, as shown in figure 1), which attaches the stator to the housing.

Regarding claim 5, Heyden et al. discloses a cooling channel (not number, as shown in figure 1) in the stator bracket.

Regarding claim 6, Heyden et al. discloses the stator bracket bounds the receiving space radially.

Regarding claim 7, Heyden et al. discloses the centrifugal mass comprising a radially inner first area, a radially outer second area, and a third area connecting the first and second areas, which are offset both radially and axially.

Regarding claim 8, Heyden et al. discloses the first area and the third area that bound two sides of thereceiving space.

Regarding claim 13, Heyden et al. discloses the clutch comprising a clutch disk (40) arrangement. The clutch disk arrangement comprises the component in the receiving space.

Regarding claim 14, Heyden et al. discloses the clutch comprising an actuating device (as shown in figure 1). The actuating device comprises the component accommodated in the receiving space.

Regarding claim 17, Heyden et al. discloses a diaphragm spring (34), which is accommodated in the receiving space.

Regarding claim 18, Heyden et al. discloses the at least one component comprising at least one torsion damper (36).

Regarding claim 19, Heyden et al. discloses the electrical machine, which is a starter-generator.

## Response to Arguments

4. Applicant's arguments filed 9/23/2005 have been fully considered but they are not persuasive. In response to applicant's remark on page 5 that Heyden et al. fail to show a clutch comprising at least one component spaced radially inwards from the electric machine. The examiner disagrees, because Heyden et al. a clutch (26) having at least one component spaced radially inward from the electric machine in the receiving space (Notice the electric machine located in front of the clutch in a housing (74) and in a space between a bolt (30) of a centrifugal mass (24). Therefore, the clutch can be considered inwardly from the electric machine).

### Conclusion

5. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Application/Control Number: 10/678,334 Page 5

Art Unit: 3618

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
